

## **Engineering Projects Manager**

Looking for unique and innovative opportunities to expand and showcase your technical skills and management abilities? The National Concrete Masonry Association, an international association located in Northern Virginia, has an immediate opening for an entry-level engineer with a background in civil, geotechnical, or structural engineering to be part of a dynamic team of industry leaders. Responsibilities include development of technical standards, design resources, education and training programs, and oversight of research programs. Successful candidate blends leadership and enthusiasm with excellent communication skills and technical competence.

The ideal candidate qualifications include:

- MS in Engineering or equivalent;
- Strong public speaking and communications skills;
- Proficiency in technical writing;
- Ability to meet deadlines and follow through on assigned tasks;
- Ability to travel nationally and internationally; and
- Professional registration or ability to become registered in the near-term.

The position offers competitive pay and benefits. For confidential consideration, submit cover letter and resume to [jthompson@ncma.org](mailto:jthompson@ncma.org). NCMA is an equal opportunity employer. [www.ncma.org](http://www.ncma.org)
